PROFILE

I'm a passionate Web Developer and QA tester. I come from various backgrounds, and I'm looking forward to expand my experience as a **Front-End Developer or QA Automated tester**. I love creating fully functional and eye-catching projects and I try to be as **creative, adaptable and communicative** as possible! I work my best in dynamic environments and ones that teach me new tools and methodologies to grow more each day!

MOST RECENT PROJECT

Soundstagram!

📅 06/2025 - 07/2025 🗂 Remote
🔗 https://soundstagram.onrender.com

Collaborated in the development of Soundstagram!, a music social media platform.

- **Front-end** development using **React, JavaScript, HTML and CSS**.
- **Back-End** development using **Python and Flask**.
- Managed databases using **PostgreSQL**.
- Ensured secure application interaction through **JWT Authentication**.
- Integrated **Wavesurfer.js & Tone.js** for multimedia functionalities.
- Maintained code versions and project updates using **GitHub**.

EXPERIENCE

Consecutive Interpreter

Inter-American Global Solutions

📅 10/2024 - 01/2025 🗂 USA (Remote)
• Instant interpretation between Spanish-English in medical environments, emergencies and 911 calls.
• Knowledge of communication procedures and HIPAA regulations.

Front End Developer

BoxNCase

📅 06/2023 - 07/2024 🗂 New York, USA (Remote)

First immersion into the world of web development, I learned the foundations, and it started my passion for making functional and eye-catching components.

- Designed solutions using React.js.
- Implemented a functional shopping front for the company with a team, making the UX accessible and responsive for clients.
- Worked and tested closely with the QA team using Cypress.

Computer Technical Specialist

Desarrollos Creativos NASA

📅 2020 - 01/2025 🗂 Caracas, Venezuela

- Built workstations so the company could have top-notch technologies for their work.
- Troubleshooted software issues with the programs the company was using.
- Instructed workers to use the software in different manners to ensure its correct usability.
- Improved parts of workstations that failed to meet the company standards.
